# Management software of prints

Tracking, quotas and set up of a print policy
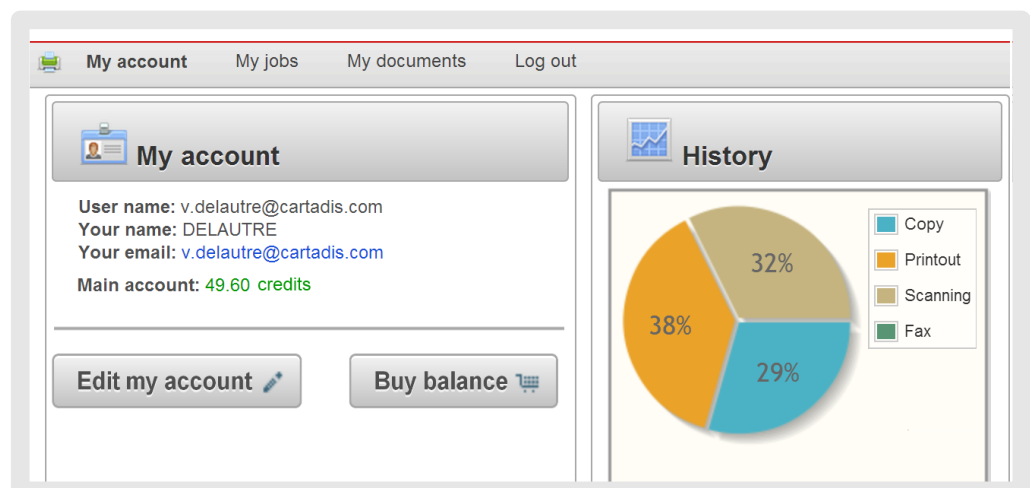

Key points

- Control of prints on networked printers, local (usb) and multifonctions.

- Manage the user accounts with quotas or payment.

- Set up of a print policy: mandatory or suggested redirection and modification of documents (forcing to black & white and duplex).

General	Cost	Compatibility	Access Right	Jobs handling rules

Current rules

| Rule type		Action to perform
If file name matches	mail	Enforce Duplex
If page number is greater than	100	Redirect to Trash
If page number is greater than	20	Suggest redirect to Reprography service

🗑 **Delete**

- Get tools to a rigorous cost management.

- Feedback of counters (MPS).

- An event log, automatic purges and backups and a High Availability.

- A customized Web user interface.

- Synchronization of user accounts with your own tools AD / LDAP / CSV data base.

- Edition of automatic and customizable reports (sent by mail, data export in csv, pdf and graphical reports).
