eTerminal KYOCERA

**Embedded terminal
specifically designed for
Kyocera devices**

This module leverages the integrated touchscreen of Kyocera MFPs to enhance functionality, strengthen security, and provide an intuitive user experience for all types of users.

Available* with :  Gespage  Gespage Stratus

* Compatible with Hybrid Platform for Advanced Solutions (HyPAS).

Key features

 **Secure user authentication:**
Multiple authentication methods available to ensure secure and flexible access to MFPs

 **Print2Me feature:**
Secure document printing and release from any MFP equipped with an eTerminal.

 **Scanning features:**
Streamlined scan management with an intuitive interface and optimized document processing.

 **Access rights management:**
Secure and optimized control of MFP functionalities through advanced access rights management.

 **Document editing:**
Easily manage your pending print jobs directly from the MFP through an ergonomic interface designed for fast and efficient handling.

 **Gespage mobile app:**
Manage and release print jobs from the Gespage mobile app on your smartphone (iOS / Android).

• Secure access to MFPs

Multiple authentication methods ensure secure and flexible access, such as:

- Username / Username and password
- RFID card/badge (with or without PIN code)
- Print code
- Guest access for temporary users

The home screen can be customized with a company logo

• Simple navigation and access rights control

After logging in, the Gespage home menu is displayed to select: Print, Scan, or Copy.

The Gespage eTerminal enables access rights management by user or group, according to defined rules (limited access to color, scanning, etc.).

It also displays the user's credit before and after print jobs, as well as the applied rates for them..

• Print2Me feature and print management

After authentication, the solution ensures secure and confidential printing, allowing users to retrieve their documents from any MFP equipped with an embedded terminal.

Printing is easily managed from the MFP: documents can be selected or deleted from the interface, and settings can be modified (forced black and white, duplex, change in the number of copies).

• Scanning functionality (Scan)

Gespage's «Advanced Scan» simplifies scan management through an intuitive interface, with optimized features for fast and efficient document processing.

- Scan to email.
- Scan to personal or shared folder.
- Scan to cloud services (OneDrive / Google Drive / SharePoint Online). Built-in OCR, PDF indexing, and blank page removal.

🌱 Sustainable printing

Gespage enables you to significantly reduce your carbon footprint while promoting the adoption of best practices to print smarter and more sustainably within your organization.

Additional equipment
