# Embedded terminal for
MFP CANON

The **« eTerminal-Canon »** embedded terminal works with the CANON Multifunction and enables the communication between the MFP and the **GESPAGE** server.

This embedded software enables secured printing thanks to user's identification by entering a code on the touchscreen or by using a card.

The **eTerminal-Canon** makes using the MFP easier, more ergonomic and above all more productive in use. A simple click enables the user to interact with documents that he wishes to copy and print and this in compliance with confidentiality and GDPR regulations.

Scheme of a network configuration

Embedded terminal benefits

- **Safety / Access management**

  ✓ Safe use of CANON MFP by login, login/password, code, card (badge reader in option).

  ✓ Possibility to set up access rights for each user or group of users.

- **Intuitive interface**

  ✓ Personalized welcome to the user.

  ✓ Display of the user credit before and after the operation as well as printing tariffs (A4, A3, BW, Color) and scan.

- **Scanning management**

  ✓ Scan to user's email.

- **Printing management**

  ✓ The user can select one or more documents from the pending Print List, release them, delete them or keep them pending.

  ✓ Setup of a printing policy with change of job properties (black & white forcing, duplex forcing and modification of the number of copies).

- **Accounting and reporting**

  ✓ Wide range of available reports.

Specifications

✓ Compatible with card readers Cartadis TCM3/TCM4.
